For the 9 Southern States expectedmore than triple rop. Here are the latest expended with 1964 production up 6,400,000; Georgia, 5,000 1,700,000, up 1,450,000; Alassa 175,000, up 15,000; Arkansa 0,000, down 90,000; Mississa 120,000, down 80,000 bushes	d at 46 million bushelsa maller than average. Produclabama accounts for most of ates a crop of 17.5 million e the size of 1964's freezestimates for the 9 Southern n: South Carolina, 7,500,000 0,000, up 3,200,000; North labama, 1,250,000, up 950,000; as, 1,050,000, down 50,000; ippi, 250,000, unchanged; and els.	
particula: ApricotsProduction	rly the Thompson Seedless van is now estimated at 231,10		
-	12% above average. rnia, the crop is expected t	to total 185,000 tons, (dried	

basis), which is 3% larger than a year ago and a third above

average.

Cherries	The crop is sharply down this year. Estimated at 18,269,000 bushels, it's a sharp 39% below 1964 as well as 30% below average. The sweet cherry crop, estimated at 88,600 tons, is 26% smaller than last year but 2% above average. Sour cherries are expected to total 184,500 tons33% below last year but 36% above average. While no actual figures are yet available, the crop is expected
199200	to be smaller than last year's, but a little above the recent 5-year average.
	The Nation's 1964-65 orange crop, now estimated at 121.4 million boxes, was 87% harvested by June 1. Compared with the previous season, production is up 31%, with Florida accounting for most of the increase. Grapefruit output, placed at 40.3 million boxes, is 18% greater than the previous production, with only 9% of the crop remaining for harvest by June 1. California and Arizona lemons, expected to total 14.6 million boxes, are 23% below a year earlier. By June 1 almost half the crop remained unharvested. Holdings on June 1 totaled 321 million pounds. A year ago supplies were only 210 million. Average for the date is 279 million
Frozen concentrated orange	pounds.
juice	Processors' stocks are highest since 1962. Total supplies for the season may reach 100 million gallons. Right now the pack stands at 89 million gallons.
NUTS	Forecast for almonds this year is 74,000 tons in-shell. That's 2% above last year and 19% more than average. As for walnuts, California's crop is estimated at 83,000 tons4% less than last year but a fifth above average.
VEGETABLES	Looking ahead, seasonally heavy supplies of fresh vegetables are on the way to market. Over the next 8 to 10 weeks production is expected to run about 5% larger than last year. As for potatoes, the late spring crop is estimated at 25,426,000 hundredweighta
	little more than a fourth larger than 1964 production, and 4% above the recent 5-year average. The early summer crop is placed at 11,264,000 hundredweight, or 2% smaller than a year earlier and 18% below average.
Frozen	The June 1 inventory placed stocks of frozen vegetables at 824 million pounds17% smaller than a year earlier, but 11% higher than average.

The Plentiful Foods Program

The Consumer and Marketing Service of the U.S. Department of Agriculture, through its Plentiful Foods Program, is cooperating in these food campaigns:

AUGUST SANDWICH MONTH. August 1 - 31 SUMMER TURKEY TIME August 1 - 31 SCALLOP FESTIVAL DAYS. August 6, 7, 8

The following foods will be in plentiful supply during the month of August:

FRESH PLUMS
BROILER-FRYERS
GRAPES
FROZEN CONCENTRATED ORANGE JUICE
